The Honorable Mitch McConnell Majority Leader United States Senate Washington, DC 20510

The Honorable Chuck Schumer Minority Leader United States Senate Washington, DC 20510 The Honorable Paul Ryan Speaker United States House of Representatives Washington, DC 20515

The Honorable Nancy Pelosi
Minority Leader
United States House of Representatives
Washington, DC 20515

Dear Majority Leader McConnell, Speaker Ryan, Minority Leader Schumer, and Minority Leader Pelosi:

On behalf of the undersigned health professions organizations, we urge you to ensure that all members of the health care workforce with Deferred Action for Childhood Arrivals (DACA) status are able to continue their employment, education, training, and research, with passage of a permanent legislative remedy as soon as possible. By providing a legal pathway to permanent residency for undocumented Americans brought to the U.S. as children, Congress can help our country produce a diverse and culturally responsive health care workforce to meet the needs of underserved populations, promote health equity, and avoid unnecessary disruption in our education and training systems.

While current DACA recipients will not lose their status until March 5, 2018, health professions students with DACA status and the institutions that train them need a definitive remedy as they enter the next stage of their education and career. For example, on September 6, 2017 — a day after the administration's decision to rescind the DACA executive action — medical students with DACA began submitting applications to residency programs to complete their training. Teaching hospitals and medical schools are currently interviewing these applicants, and in January both will submit their rank order lists for the National Residency Matching Program or "Match." This process involves a significant investment by all parties involved and is a critically important part of U.S. academic medicine.

With the nation's population growing and becoming increasingly diverse, it is crucial that the health professions workforce respond to the changing demographics of the country to mitigate racial, ethnic, and socioeconomic health disparities. Research demonstrates that diversity in the health professions leads to improvements in access to care for underserved communities, and some studies have shown that patients report greater satisfaction with clinical care when they are treated by providers from the same racial/ethnic background. Diverse health professions school classes also enhance the ability of the entire workforce to provide culturally competent care to individuals regardless of their background.

Health professions students with DACA status encompass a diverse, multiethnic population, who are often bilingual and more likely to practice in underserved communities. Legislation granting lawful presence in the U.S. and work authorization to the narrow cohort of undocumented students that meet DACA criteria would enhance our health care workforce and restore certainty to health professions schools and residency training programs.

Our organizations are dedicated to promoting a culturally competent, diverse, and prepared health and biomedical workforce that leads to improved care and health equity. A permanent legislative remedy would help us achieve this goal. We urge congressional leadership to advance legislation as soon as possible to ensure health professionals participating in DACA are able to continue their employment, education, training, and research.

Sincerely,
