

## Practical Gynecology, 2<sup>nd</sup> Edition – Chapter 13 References

1. **Rufford BD, Jacobs IJ, Menon U.** Feasibility of screening for ovarian cancer using symptoms as selection criteria. *BJOG*. 2007;114:59-64.
2. **ACOG Committee on Practice Bulletins—Gynecology.** ACOG Practice Bulletin No. 83: Management of Adnexal Masses. *Obstet Gynecol*. 2007;110:201-14. *This bulletin details the ACOG management guidelines for adnexal masses. An overview is provided, followed by current evaluation and treatment recommendations.*
3. **Padilla LA, Radosevich DM, Milad MP.** Limitations of the pelvic examination for evaluation of the female pelvic organs. *Int J Gynaecol Obstet*. 2005;88:84-8. *In this study, women about to undergo laparoscopy or laparotomy underwent pelvic examination under anesthesia by examiners blinded to their diagnosis. Surgical findings were then compared with examiners' findings. The sensitivity to detect adnexal masses was low, and further reduced by obesity.*

5. **Wolf SI, Gosink BB, Feldesman MR, et al.** Prevalence of simple adnexal cysts in post-menopausal women. *Radiology*. 1991;180:65-71.
6. **Goff BA, Mandel LS, Drescher CW, et al.** Development of an ovarian cancer symptom index: possibilities for earlier detection. *Cancer*. 2007;109:221-7. *This case-control survey that included 149 women with ovarian cancer found 6 symptoms which, when present for less than 1 year and occurring more than 12 days each month, were associated independently with this malignancy. These symptoms were pelvic/abdominal pain, increased abdominal size/bloating and difficulty eating/feeling full.*
7. **Jacobs IJ, Fay TN, Stabile I, et al.** The distribution of CA 125 in the reproductive tract of pregnant and non-pregnant women. *Br J Obstet Gynaecol*. 1988;95:1190-4.
