\*31. **Rosene-Montella K, Keely E, Laifer SA, Lee RV.** Evaluation and management of infertility in women: the internists' role. *Ann Intern Med.* 2000;132:973-81. *This review provides the primary care physician a general overview of the causes of infertility and the current interventions available. Also, the potential medical complications of infertility treatments are described.*

\*32. **Johnson NP, Mak W, Sowter MC.** Surgical treatment for tubal disease in women due to undergo in vitro fertilization. *Cochrane Database Systematic Reviews* 2004, Issue 3, CD 002125. *This systematic review addressed the issue of women with hydrosalpinges who were preparing to undergo in vitro fertilization. The authors concluded that odds of pregnancy and live birth with IVF-ET were improved if laparoscopic salpingectomy was performed first compared with no intervention. No differences between the two groups were seen for ectopic pregnancy, miscarriage or treatment complications.*
