

# CDC Coalition

June 21, 2019

The Honorable Roy Blunt  
Chair  
Senate Appropriations Subcommittee  
on Labor, Health and Human Services,  
Education, and Related Agencies  
Washington, DC 20510

The Honorable Patty Murray  
Ranking Member  
Senate Appropriations Subcommittee  
on Labor, Health and Human Services,  
Education, and Related Agencies  
Washington, DC 20510

Dear Chairman Blunt and Ranking Member Murray:

As you work to develop the Senate's FY 2020 Labor, Health and Human Services, and Education, and Related Agencies Appropriations bill, the 120 undersigned members of the CDC Coalition and other supporting organizations urge the Senate to match the \$8.22 billion provided to the Centers for Disease Control and Prevention's programs in the House FY 2020 Labor, Health and Human Services, and Education, and Related Agencies Appropriations bill. This total includes a transfer of \$225 million from the HHS Nonrecurring Expenses Fund for one-time projects to improve CDC research and campus infrastructure. With these increases, the House was able to provide additional resources to many CDC programs and to fund important new initiatives critical to improving the nation's health. We also urge Congress to immediately come together to forge a bipartisan deal to raise the current spending cap for nondefense discretionary programs which is essential to achieving these critical increases for CDC programs.

The CDC Coalition is a nonpartisan coalition of organizations committed to strengthening our nation's public health infrastructure and prevention programs. Our mission is to ensure that health promotion and disease prevention are given top priority in federal funding, to support a funding level for CDC that enables it to carry out its prevention mission and to assure an adequate translation of new research into effective state and local programs. Coalition member groups represent millions of public health workers, researchers, clinicians, educators and citizens served by CDC programs.

CDC serves as the command center for the nation's public health defense system against emerging and reemerging infectious diseases. From aiding in the surveillance, detection and prevention of the Zika virus to playing a lead role in the control of Ebola in West Africa and the current outbreak in the Eastern Democratic Republic of the Congo to monitoring, investigating and helping to control the current measles cases and outbreaks in the U.S., to pandemic flu preparedness, CDC is the nation's – and the world's – expert resource and response center, coordinating communications and action and serving as the laboratory reference center. States, communities and the international community rely on CDC for accurate information and direction in a crisis or outbreak.

CDC is faced with unprecedented challenges and responsibilities ranging from combating the opioid, tobacco and obesity epidemics to emergency preparedness and chronic disease prevention. CDC funds programs for injury control and violence prevention; global health security; health promotion in schools and workplaces; the prevention of diabetes, heart disease,

stroke, cancer, lung disease, arthritis and other chronic diseases; tobacco prevention and control; nutrition and physical activity; immunizations; reducing and preventing vector-borne diseases; HIV/AIDS prevention; environmental health, including the prevention of childhood lead poisoning; oral health; reducing health disparities; preventing infant mortality and birth defects; preventing antimicrobial resistance; preventing prescription drug overdose; improving the health and quality of life of individuals with disabilities; vision and eye health and public health research and health statistics. It is notable that more than 70 percent of CDC's budget supports public health and prevention activities by state and local health organizations and agencies, national public health partners and academic institutions.

In addition to ensuring a strong public health infrastructure and protecting Americans from public health threats and emergencies, CDC programs are crucial to reducing health care costs and improving health. Despite the progress CDC has made to meet these needs, the agency's programs have been woefully underfunded. **We urge you to prioritize CDC funding and to support a funding level of at least \$8.22 billion for CDC's programs in FY 2020 as was provided in the House version of the legislation.**
