Competency in Interpretation of 12-Lead Electrocardiograms: A Summary and Appraisal of Published Evidence

This ACP paper is part 2 of a 2-part series on interpretation of 12-lead resting electrocardiograms (ECGs). Part 2 is a systematic review from ACP of detailed supporting evidence for the recommendations. Part 1 is a ACP position paper that presents recommendations for initial competency, competency assessment, and maintenance of competency on ECG interpretation, as well as recommendations for the role of computer-assisted ECG interpretation.
