

## **ACP Cybersecurity Policy Statement**

**Approved by the Board of Regents on February 11, 2025**

- 1. ACP recommends that the health care sector prioritize the cybersecurity and cyber resilience of health information technology (IT) systems.**
- 2. ACP reaffirms that developers and vendors of all health IT systems should ensure that their products and systems are secure-by-design and recommends that these offerings be secure-by-default.**
- 3. ACP recommends that HHS/CMS, state Medicaid agencies, and private payers ensure timely payment remedies for physicians impacted by large-scale cybersecurity incidents.**
