Show me and I may remember  
Involve me and I’ll understand”

“Chinese Proverb”
Dear Colleagues,

Greetings for new year 2024! Hope it may be brighter & healthier for all of us. I believe most of us ended previous year in a feeling of satisfaction. Lot of pleasant memories are there to treasure. Our chapter has won again Gold Excellence Award in past year. Elections for Governor elect are over. New Governor elect Prof Swati Srivastava has started working as Governor Elect Designee. In April 2024, she will start working as Governor Elect. She is also the editor of the current edition of this newsletter. I believe you will appreciate her efforts.

In the new year 2024 we are going to begin few new programs like Artificial Intelligence in Human Health, monthly web series for a year. Those who will attend at least 10 out of 12 modules, shall receive the completion certificate from ACP India Chapter. Newly elected Advisory council has taken charge and is fully active in great enthusiasm. New wing of Advanced career Physicians is eager to start some program to engage senior physicians in ACP India chapter activities.

This year we are planning to outreach those areas where ACP presence is less in terms of membership. We are planning outreach educational CMEs in those areas like North East part of country.

ACP India chapter is planning more public awareness and health check-up activities for deprived section of societies. Dr Abhijit Gupta has organised two such activities for anemia detection and awareness among villagers of remote areas in Bihar state. It is my appeal to all members of ACP India chapter to do patient care & public education activities in your area and share the report with us. We shall give them place in our newsletter.

Another time I wish to encourage maintain your membership without break to remain on board for various activities of ACP India Chapter. Apply for FACP if you have completed your 3 years being member in continuation. Apply for various awards of ACP India chapter. Eligible candidates can apply for MACP.

Get yourself registered for Boston annual conference of ACP. You can take the advantage of group registration. Motivate others doctors in your area to become member of ACP.

Eligible residents are encouraged to send their entries to participate in "Doctor’s Dilemma" competition to Prof Swati Srivastava. She is head of screening committee for this competition in India and responsible for India team selection.

With lot of best wishes looking forward to see you in Boston.

Prof. Anuj Maheshwari,
Governor,
ACP India chapter
Dear Colleagues,

It is my proud privilege to be writing this editorial for the ACP newsletter. It is a greater honor to be writing in the capacity of the Governor Elect Designee for the chapter.

As we know, the ACP is one of the largest and most impactful global organizations in the field of Medicine. The India chapter attempts to fulfill its efforts to connect amongst internists, support and motivate each other by the various educational events, collaborations, and other activities.

In continuum with the previous months, this quarter of the year also witnessed some important CMEs, lecture series as well as case files presentations on the ACP, India platform. The study conducted by ACP India chapter on Prevalence of Subclinical Hypothyroidism in patients with type 2 diabetes was presented as one of the best posters on the World platform, IDF. Academic activities involving residents and students encouraged enhanced participation by these groups in the ACP.

With this collaborative teamwork approach, let's move on to the New Year 2024, applying our scientific knowledge and clinical efficiency to treat emphatically the intricate ailments of our patients. Let's also be aware and pay adequate attention to our own physical, mental as well as psychological and social health as well of our peers.

While bidding adieu to the much enriching year 2023, I wish the New Year 2024 to usher in new dreams and achieve greater heights while maintaining good health to all my friends in the ACP.

Prof. Swati Srivastava
Editor, Governor Elect Designee
ACP, India Chapter
Congratulations to the India Chapter Governor Elect Designee (GED), Swati Srivastava, MBBS, MD, FACP. Our new GED will complete a year of training as a Governor-Elect and then will start their four-year term as Governor in the Spring of 2025. As Governor, Dr. Srivastava will serve as the official representative of the College for our Chapter, providing a link between members at the local level and leadership at the national level. In the meantime, Dr. Srivastava will be working closely with Dr. Maheshwari (the current governor) and College and their duties as Governor. To learn more about the new GED, read their bio below.

Medical School Education: MBBS and MD, Baroda Medical College, MS University, Vadodara, Gujarat. (I secured Gold medal for being the best candidate in MD Examination of the year 1995 in the Institute.

Medical School Education: Fellow in Diabetes, CMC Vellore; Trained in Endocrine Techniques, Applications, NIN, ICMR

Board Certifications: MBBS and MD, Baroda Medical Colle, MS University, Vadodara Gujarat

Prof. Swati Srivastava presented the paper on Study conducted by ACP India chapter at the Virtual International Diabetes Federation, World Congress, on 7th December 2023. The paper was selected for oral presentation as one of the best posters, a significant achievement for the chapter.

The paper was on the study conducted by the ACP, India chapter, on Prevalence of subclinical hypothyroidism in patients with Type 2 diabetes Mellitus, a multicentric study covering 20 cities from North, south, east, west and Central India.

The study authors were Dr Anuj Maheshwari, Dr Swati Srivastava, Dr Mukhyaparna Prabhu and others.
UNDIAGNOSED SUBCLINICAL HYPOTHYROIDISM AMONG TYPE 2 DIABETES MELLITUS PATIENTS - A CLINIC BASED STUDY IN INDIA

INTRODUCTION
Diabetes and thyroid disorders are common endocrine diseases1. Uncontrolled diabetes may affect thyroid hormone levels. Indian guidelines lack clarity on thyroid monitoring in Type 2 Diabetes Mellitus (T2DM) patients2. ACP India chapter conducted this study to assess the situation in India.

AIM
- To determine the prevalence of undiagnosed subclinical hypothyroidism (SCHT) among Indian patients with T2DM without known thyroid disorders.
- To assess if there is a relationship between TSH levels and glycemic status.

METHODOLOGY
After approval from the ethics committee, adult patients with T2DM without a known history of thyroid disorders from twenty locations in India were included in the study. EMR (Medico) recorded medical history and laboratory values, including thyroid function tests and glycemic status in these patients. Data from March 2023 to July 2023 was analyzed.

RESULTS
Of the 1271 T2DM patients enrolled in the study, 58% were male, and 42% were female. The average age was 52.7 years. Hypothyroidism was newly detected in 23% of patients with T2DM, out of which 22% had subclinical hypothyroidism. Hyperthyroidism was found in 1% of the patients. The average HbA1c in the euthyroid group was 8.05%, while for the group with TSH (>5 mIU/L), it was 7.75%. A statistically significant difference is observed between these two groups.

CONCLUSION
Undiagnosed hypothyroidism, detected on routine thyroid screening, was prevalent at 22% in the studied Indian population with T2DM. Given the heightened cardiovascular risk and impact on metabolic health associated with both T2DM and thyroid disorders, routine thyroid screening in diabetic patients is crucial for early detection and treatment of subclinical thyroid dysfunction. Integrating thyroid function tests into T2DM guidelines should be considered.
Post Graduate students program ACP India with DRWA and HIMS, Ataria Live workshop
Congratulations!!
