Actions Taken on BOG Resolutions, April 20, 2024, Board of Regents Organizational Meeting

Adopted and referred for implementation: (Lines 49-55)
6-S24. Advocating for Vaccination Incentives

Adoption/Implementation with Amendments: (Lines 58-103)
1-S24. Developing Educational Programs to Train Internal Medicine Physicians in the Care of Sexual and Gender Minority Persons
4-S24. Improving the Experience of International Medical Students (IMS) and International Medical Graduates (IMG) Seeking Clinical Observerships and Letters of Recommendation in the United States of America and Canada
7-S24. Seeking Full Coverage of All Advisory Council on Immunization Practices (ACIP) Recommended Vaccines under Medicare Part B
12-S24. Streamlining Longitudinal, Uninterrupted Access to Critical Health Services that Support Daily Activities and Safe, Independent Living for Patients with Chronic Persistent or Progressive Impairments

Adopted as a Reaffirmation: (Lines 106-152; 174-184)
3-S23. Developing Educational Resources to Train Physicians about the Evolving Threats of Climate Change on Human Health
5-S24. Advocating for Continued Coverage of Colon Cancer Screening
9-S24. Acknowledging the Individual Right to Decisional Privacy
14-S24. Reducing the Risk of Medical Workplace Violence

Adopted with BOR Amendments for Implementation (Lines 155-171; 199-243)
6-S23. Promoting Research on the Public Health Impact of Extreme Risk Protection Orders (ERPOs) in Reducing Firearm Death and Injury
10-S24. Updating ACP Policy to Support Physicians Pursuing Collective Empowerment

Adopted as a BOR substitute resolution for Implementation (Lines 245-269)
15-S24. Advocating that the Dietary Guidelines for Americans Use National Academy of Medicine (NAM) Institute of Medicine (IOM) and Guidelines International Network’s Standards to Develop Clinical Guidelines

Referred for Study: (Lines 186-197; 271-321)
8-S24. Approaching Physician Suicide as a Problem Requiring Healthcare System Change
16-S24. Educating the Public about the Appropriate Identification of Healthcare Professionals in Clinical Settings
17-S24. Promoting and Developing Initiatives Related to Narrative Medicine
18-S24. Supporting our Military Membership at the American College of Physicians by Developing a Special Dues Category for Active Members of the U.S. Armed Forces

The Board of Regents approved, as a Consent Calendar, the recommendations regarding the disposition of each of the following resolutions recommended for adoption at the Spring 2024 Board of Governors Meeting:
BOG Recommended for Adoption/Implementation:

Resolution 6-S24. Advocating for Vaccination Incentives
(RRC Referral Recommendation: Medical Practice and Quality Committee [MPQC] with input from the Immunization Committee)

RESOLVED, that the Board of Regents will partner with other medical specialty organizations to advocate for insurance companies including Medicare and Medicaid, to reduce their premiums or offer some other financial incentive to those members who are vaccinated according to Advisory Committee on Immunization Practices (ACIP) recommendations.

BOG Recommended for Adoption/Implementation with Amendments:

Resolution 1-S24. Developing Educational Programs to Train Internal Medicine Physicians in the Care of Sexual and Gender Minority Persons
(RRC Referral Recommendation: Education Committee with input from Division of Governmental Affairs and Public Policy [DGAPP] staff)

RESOLVED, that the Board of Regents recognize the importance of education for all internal medicine physicians regarding the topics of sexual and gender minority health and the provision of culturally and clinically competent gender affirming care at all levels of medical training including undergraduate and graduate medical education; and be it further

RESOLVED, that the Board of Regents, along with other interested parties as necessary, make available updated medical education programs and clinical resources for internal medicine physicians enabling them to provide culturally and clinically competent care, inclusive of gender affirming care, for all members of the LGBTQ+ Community.

Resolution 4-S24. Improving the Experience of International Medical Students (IMS) and International Medical Graduates (IMG) Seeking Clinical Observerships and Letters of Recommendation in the United States of America and Canada
(RRC Referral Recommendation: Education Committee with input from Diversity, Equity, and Inclusion Committee)

RESOLVED, that the Board of Regents condemns the exploitative practice of for-profit letter of recommendations and observerships; and be it further

RESOLVED, that the Board of Regents further studies the problem and works with the Accreditation Council for Graduate Medical Education (ACGME), Alliance for Academic Internal Medicine (AAIM), Association for Program Directors in Internal Medicine (APDIM), Education Commission for Foreign Medical Graduates (ECFMG), and other partners to develop a transparent, ethical, and fair system to enhance IMS and IMG medical training and incorporation into the U.S. healthcare workforce.

Resolution 7-S24. Seeking Full Coverage of All Advisory Council on Immunization Practices (ACIP) Recommended Vaccines under Medicare Part B
(RRC Referral Recommendation: MPQC with input from the Immunization Committee)

RESOLVED, that the Board of Regents seek full coverage of all Advisory Council on Immunization Practices (ACIP) recommended vaccines under Medicare Part B, to enable optimal preventative care for patients to be able to receive all ACIP-recommended vaccines in their primary care physicians’ or clinicians’ offices as covered services without cost shifting.
Resolution 12-S24. Streamlining Longitudinal, Uninterrupted Access to Critical Health Services that Support Daily Activities and Safe, Independent Living for Patients with Chronic Persistent or Progressive Impairments

(RRC Referral Recommendation: MPQC)

RESOLVED, that the Board of Regents advocates for streamlined, longitudinal, uninterrupted access to critical health services that support daily activities and safe, independent living for patients with chronic persistent or progressive impairments by taking the following action:

1. Advocate to CMS and other payers to remove the mandatory recertification requirements for critical health services that support daily activities and safe, independent living for patients with chronic persistent or progressive impairments.

BOG Recommended for Reaffirmation:

Resolution 9-S24. Acknowledging the Individual Right to Decisional Privacy

RESOLVED, that the Board of Regents acknowledges that patients’ right to autonomy includes the right to make their own independent medical decisions, with or without reliance on a patient-clinician relationship and, as such, will adopt and advocate for positions in furtherance of this acknowledgment.

**College policy/practice being reaffirmed:**

ACP policy has long recognized that patients have the right to make their own decisions about health care, in keeping with their values and preferences, “based on the philosophical and ethical concept of respect for autonomy, the common-law right of self-determination, and the patient’s liberty interest under the U.S. Constitution” (1).

The ACP Ethics Manual likewise recognizes that “[p]rivacy is freedom from unauthorized intrusion,” and that need or illness do not “change a patient’s legal rights” (1).

Resolution 14-S24. Reducing the Risk of Medical Workplace Violence

RESOLVED, that the Board of Regents discuss what actions might be taken to reduce the risk to physicians from workplace violence. Actions might include, but are not limited to, having ACP develop teaching packages which provide instruction on how to deal with such incidents in a manner that reduces the risk of serious injuries occurring, as well as encouraging medical settings to place in service protective measures such as screening for individuals entering medical settings with handguns or other potentially lethal instruments.

**College policy/practice being reaffirmed:**

The Health and Public Policy Committee developed a position statement on policy standards for workplace violence prevention and management approved by the Board of Regents (BOR) in fall 2021. In 2022, ACP developed an Advocacy Toolkit also to help with member advocacy to pass legislation to protect health care workers.
BOR Adopted as a Reaffirmation:

Resolution 3-S23. Developing Educational Resources to Train Physicians about the Evolving Threats of Climate Change on Human Health

RESOLVED, that the Board of Regents will expand and develop educational resources to train physicians about the evolving threats of climate change and environmental degradation on human health through dedicated comprehensive coursework and tracks within conferences, supported by online resources such as an up-to-date compendium of clinical research, links to relevant organizations, communication tools, and lectures.**

**College policy/practice being reaffirmed:

DGAPP and Education staff identified currently available resources as well as content being developed that aligned with and fulfilled the intent of Resolution 3-S23. A “Final Report” on Resolution 3-S23, submitted for the April 16, 2024 BOR meeting, highlighted multiple educational sessions at the 2024 Internal Medicine Meeting (IMM), a 2025 IMM educational session, and an IM 2025 Global Engagement Committee (GEC) session, as well as a number of education resources. Additionally, the ACP Toolkit: Climate Change and Health is in the process of being updated.

BOR Adopted with Amendments for Implementation:

Resolution 6-S23. Promoting Research on the Public Health Impact of Extreme Risk Protection Orders (ERPOs) in Reducing Firearm Death and Injury

(RRC Referral Recommendation: Health and Public Policy Committee [HPPC] with input from Ethics, Professionalism, and Human Rights Committee [EPHRC] on the 2nd resolved clause and Medical Education staff on the 3rd clause)

RESOLVED, that the Board of Regents promote research on the public health impact of Extreme Risk Protection Orders (ERPOs), in particular on reducing suicide as well as intimate partner violence injury and mass shootings; and be it further

RESOLVED, that the Board of Regents research and make recommendations in regard to the administrative burden, legal liability concerns, and ethical concerns for physicians and other clinicians filing ERPOs; and be it further

RESOLVED, that the Board of Regents identify and disseminate concise, actionable educational resources for students, residents and practicing clinicians on effective counseling and harm reduction interventions when patients or family members express a concern that they or someone they know is at risk for firearm violence, including resources to advise on ERPOs when indicated.

Board members extracted the following resolutions from the Consent Calendar for discussion:

Resolution 5-S24. Advocating for Continued Coverage of Colon Cancer Screening

The Board of Regents extracted Resolution 5-S24 from the Consent Calendar to discuss. Following the discussion, The Board of Regents

VOTED: to approve Resolution 5-S24 for reaffirmation.

Rationale: At the April 20, 2024 meeting, the Board of Regents (BOR) approved Resolution 5-S24 for reaffirmation. In the opinion of the BOR, the work on this resolution is complete and no further work is required since the resolution reaffirms existing policy. Members of the BOR noted that the Affordable
Care Act, which ACP supports, requires coverage of preventative measures and that denial of coverage is a broader issue. The BOR also noted concerns regarding conflicting guidelines and highlighting any one medical condition over others.

**Resolution 8-S24. Approaching Physician Suicide as a Problem Requiring Healthcare System Change**

The Board of Regents extracted Resolution 8-S24 from the Consent Calendar to discuss. Following the discussion, The Board of Regents **VOTED:** to refer Resolution 8-S24 for study to the Executive Office.

Rationale: At the April 20, 2024 meeting, the Board of Regents referred Resolution 8-S24 for study to the Executive Office. BOR members noted that the work of this resolution is already being done within a consortium of organizations alongside ACP. Convening a task force is not recommended as its work would be largely research based, which is outside the scope of ACP’s work, and would have a significant impact on ACP staff time as well as a potentially significant fiscal impact. Referral to the Executive Office was approved to facilitate coordination of action among multiple committees, departments, and outside organizations.

**Resolution 10-S24. Updating ACP Policy to Support Physicians Pursuing Collective Empowerment**

The Board of Regents extracted Resolution 10-S24 from the Consent Calendar to discuss. Following the discussion, The Board of Regents **VOTED:** to refer Resolution 10-S24 to the Health and Public Policy Committee for implementation with input from Ethics, Professionalism and Human Rights Committee, Professional Development and Fulfillment Committee, and Medical Practice and Quality Committee (1st resolved clause) and to the ACP American Medical Association Delegation (2nd resolved clause) with the following amended language:

**Track Changes:**

**RESOLVED, that the Board of Regents update policy to:**

a) Support of the right of physicians to engage in collective bargaining, including physician unionization; empowermen through a variety of modalities

b) Advocate for the expansion of the numbers of physicians eligible for this right under state and federal law; and

c) Provide comprehensive guidance on physicians’ regulatory and ethical obligations in balancing direct patient care and advocacy within health systems during any collective bargaining process; and be it further

**RESOLVED, that the Board of Regents bring a resolution to the American Medical Association (AMA) seeking study of opportunities for the AMA and other physician associations to support physicians initiating collective bargaining, including but not limited to unionization, the above.**

**Clean Copy:**

**RESOLVED, that the Board of Regents update policy to:**

a) Support of the right of physicians to engage in collective empowerment through a variety of modalities

b) Advocate for the expansion of the numbers of physicians eligible for this right

c) Provide comprehensive guidance on physicians’ regulatory and ethical obligations in balancing direct patient care and advocacy within health systems during any collective bargaining process; and be it further
RESOLVED, that the Board of Regents bring a resolution to the American Medical Association (AMA) seeking study of opportunities for the AMA and other physician associations to support the above.

Rationale: At the April 20, 2024 meeting, the Board of Regents referred Resolution 10-S24 to the Health and Public Policy Committee with input from Ethics, Professionalism and Human Rights Committee, Professional Development and Fulfillment Committee, and Medical Practice and Quality Committee (1st resolved clause) and to the ACP American Medical Association Delegation (2nd resolved clause) for implementation with amended language. Members of the BOR recommended using the term “collective empowerment through a variety of modalities” rather than “unionization.” Discussion among Board members included consideration of ongoing work toward a paper by the Ethics, Professionalism and Human Rights Committee to address the ethics of collective bargaining as well as consideration of the regulatory impact and obligations. BOR members noted the intention of the resolution is to empower physicians to seek adequate conditions while continuing to provide ethical and compassionate care for patients.

Resolution 15-S24. Advocating that the Dietary Guidelines for Americans Use National Academy of Medicine (NAM) Institute of Medicine (IOM) and Guidelines International Network’s Standards to Develop Clinical Guidelines

The Board of Regents extracted Resolution 15-S24 from the Consent Calendar to discuss. Following the discussion, The Board of Regents VOTED: to refer Resolution 15-S24 to Clinical Policy staff for implementation with the following substitute language:

Original language:
RESOLVED, that ACP policy be strengthened to support advocacy for implementation of the National Academies of Sciences, Engineering and Medicine (NASEM) recommendations for processes around Dietary Guidelines for Americans (DGA) development; and be it further
RESOLVED, that the Board of Regents shall advocate for implementation of the NASEM and Guidelines International Network’s recommendations for processes around DGA development to the greatest extent possible prior to release of each set of DGA.

Substitute Language:
RESOLVED, that the Board of Regents shall advocate that Dietary Guidelines for Americans (DGA) use the National Academy of Medicine (NAM) Institute of Medicine (IOM) and Guidelines International Network’s standards to develop clinical guidelines.

Rationale: At the April 20, 2024 meeting, the Board of Regents referred Resolution 15-S24 to Clinical Policy staff for implementation with substitute language. The substitute language is intended to combine the two original resolves into one and accurately reflect that NAM (IOM) created the guidelines.

Resolution 16-S24. Educating the Public about the Appropriate Identification of Healthcare Professionals in Clinical Settings

The Board of Regents extracted Resolution 16-S24 from the Consent Calendar to discuss. Following the discussion, The Board of Regents VOTED: to refer Resolution 16-S24 for study to Marketing and Public Relations staff with input from Health and Public Policy Committee and Professional Development and Fulfillment Committee.
Rationale: At the April 20, 2024 meeting, the Board of Regents referred Resolution 16-S24 for study to Marketing and Public Relations staff with input from Health and Public Policy Committee and Professional Development and Fulfillment Committee. The BOR referred this resolution for study instead of implementation because this resolution's intent goes beyond the scope of the professional brand identity campaign and will have a potentially large fiscal impact. Board members noted toolkits are available for Chapters, ACP published a paper on team-based care, and ACP is engaged in the AMA's Truth in Advertising campaign. The Board encouraged the study to be returned to them in as short a time frame as possible.

Resolution 17-S24. Promoting and Developing Initiatives Related to Narrative Medicine
The Board of Regents extracted Resolution 17-S24 from the Consent Calendar to discuss. Following the discussion, The Board of Regents VOTED: to refer Resolution 17-S24 to the Professional Development and Fulfillment Committee for study with input from Publication and Medical Education staff.

Rationale: At the April 20, 2024 meeting, the Board of Regents referred Resolution 17-S24 to the Professional Development and Fulfillment Committee for study with input from Publication and Medical Education staff. The BOR noted the College is currently engaged in multiple activities in support of this resolution and study will more clearly define what additional work could be done and at what cost.

Resolution 18-S24. Supporting our Military Membership at the American College of Physicians by Developing a Special Dues Category for Active Members of the U.S. Armed Forces
The Board of Regents extracted Resolution 18-S24 from the Consent Calendar to discuss. Following the discussion, The Board of Regents VOTED: to refer Resolution 18-S24 to the Membership Committee for study.

Rationale: At the April 20, 2024 meeting, the Board of Regents referred Resolution 18-S24 to the Membership Committee for study. This referral is tied to the current work undertaken regarding modification of the dues structure. Members of the BOR noted that members of U.S. Armed Forces are typically well-supported in their participation with ACP. Members of the BOR who were also members of the U.S. Armed Forces were not in favor of adopting the resolution.

The Board of Regents extracted Resolution 20-S24 from the Consent Calendar to discuss. Following the discussion, The Board of Regents VOTED: to refer Resolution 20-S24 to the Publication Committee for study with input from Membership Committee and Financial Policy and Audit Committee.

Rationale: At the April 20, 2024 meeting, the Board of Regents referred Resolution 20-S24 to the Publication Committee for study with input from Membership Committee and Financial Policy and Audit Committee. This referral calls for consideration of unintended consequences if delivery of Annals of Internal Medicine defaults to electronic, including fiscal consequences and perception of benefits of membership. A detailed fiscal forecast is requested with this referral.
