GOVERNOR'S MESSAGE

Welcome to the Scientific Meeting of the Florida Chapter of the American College of Physicians. What a year we have had!! The ups and downs and ups of COVID-19 have once again ruled the airwaves, print media, medical facilities and our lives as physicians, family members, colleagues and friends. All of you will certainly join me in a collective statement of "enough already". Unfortunately, the vaccination light we saw at the end of the tunnel in July became a Delta train headlight coming back at us in August. We will now prepare ourselves for another booster shot instead of a vacation trip to New Zealand.

What can we look forward to at this time of our lives and what is the ACP doing to help make your life as a physician better? I would like to mention three important subjects that might make a difference in the coming months and years. First on my mind is the release of the 19th version of Medical Knowledge Self-Assessment Program (MKSAP), the greatest continuing medical education device ever created. I am looking forward to delving into the many MKSAP updates which will help to soothe the constant banging of the COVID-19 migraine I have been having. It will be nice to read about something other than you-know-what. Perhaps you will help me in my quest to have the ACP add extra supplements to the MKSAP specialty sections that would appeal to our fellowship trained colleagues. Imagine adding an extra section to Cardiology, Gastroenterology, Oncology, etc. that would update those folks within their fields (and anyone else with an interest in a particular specialty). Subspecialists account for more

than half of all internists and tend to drift away from the ACP following fellowship training. Next on my mind, as we emerge from COVID-19, is the advocacy we all need to have for universal health coverage. ACP has produced multiple publications on the subject with compelling information about how such a change would improve the lives of patients and physicians alike. One of those publications: *Ann Intern Med* 2020;172:S7-32, "Envisioning a Better US Health Care System for All: Coverage and Cost of Care", provides a detailed outline of the benefits we have been missing. The timing of this publication was clairvoyant because it exactly coincided (January, 2020) with the beginning of the COVID epidemic which has added further emphasis on why such change is needed. Finally, I would take this opportunity to encourage new leaders in your communities. The ACP is always evolving because Internal Medicine is always changing and updating. New leadership is a development project not a birthright. When you see Internists who exhibit leadership potential and aptitude, encourage them to join our ranks and participate. We will help them reach their full potential.

Many thanks to Dr. Mario Madruga for organizing a superb educational program and an extra big thanks to the many speakers who will grace us with their knowledge and wisdom. I'll look forward to seeing you October 29-31, 2021.

Regards,

George Everett MD MACP
Governor, Florida Chapter ACP

LEARNING OBJECTIVES

At the conclusion of this activity, the participant will be able to:

- Apply updated knowledge of internal medicine to clinical practice
- Improve clinical practice by incorporating major new developments in subspecialty medicine
- Understand recent advances in internal medicine
- Satisfy requirements of state-mandated educational course on Prevention of Medical Errors
- Satisfy requirements of state-mandated educational course on Domestic Violence

22.5 CME CREDITS & 22.5 MOC POINTS AVAILABLE

The American College of Physicians is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The American College of Physicians designates this live activity for a maximum of **22.5 AMA PRA Category 1 credit(s)**[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Successful completion of this CME activity, which includes participation in the evaluation component, enables the participant to earn up to **22.5 MOC** points in the American Board of Internal Medicine's (ABIM) Maintenance of Certification (MOC) program. Participants will earn MOC points equivalent to the amount of CME credits claimed for the activity. It is the CME activity provider's responsibility to submit participant completion information to ACCME for the purpose of granting ABIM MOC credit.
