GOVERNOR'S MESSAGE

Welcome to the 2022 Annual Scientific Meeting of the Florida Chapter of the American College of Physicians, the largest chapter of the largest medical specialty organization in the United States. While we remain in the COVID pandemic with ongoing cases and deaths in our hospitals; the opening of businesses, travel, and social activities, including medical meetings is definitely welcome. We are moving away from Zoom as the only way to meet to using it as an option for efficiency or convenience. Yet we cannot be complacent. COVID still rages on, despite vaccines, with over 1 million deaths thus far in the U.S. Nevertheless, the ability to once again travel, make connections, meet with colleagues and friends, explore our world and enjoy life is a wonderful testament to the work of physicians, scientists and public health workers worldwide.

As the FL Chapter Education Governor, I was happy to work with this year's Scientific Meeting Chairs: Allison Ferris of FAU, Jennifer Foster of FAU, Amalia Landa Galindez of FIU, and Claudio Tuda of Mount Sinai. The goal of this year's meeting is diversity, variety, health equity, return to scientific analysis of public statements, and addressing long-term threats to our patient's health and the strength of all the communities we serve. Thus, the theme is "Current Practical Approaches to internal Medicine".

You will find unique sessions such as a panel on rural, indigent, and correctional medicine – an important topic addressing the healthcare needs and limitations of some of our most vulnerable populations in often difficult practice settings. There will also be a panel on telemedicine where we will discuss the different settings that Internal Medicine specialists can use telemedicine to reach their patients and provide excellent medical care, even after the pandemic. We will also have updates in critical care, cancer, diabetes, geriatrics and neurology. For the first time, our Chapter will also have a hands-on training session for Residents & Medical Students on Point of Care Ultrasound (POCUS) led by an amazing team from Mount Sinai.

Some exceptional topics this year not to miss include social determinants of health in practice, gender-affirming care, the direct relationship of climate change on health - particularly here in Florida, lifestyle medicine/nutrition counseling to prevent chronic non-communicable disease, and human trafficking.

I want to draw your attention to two very special presenters. First, the Immediate Past President of the American College of Physicians, Dr. George Abraham, will be presenting on misinformation, disinformation, and medical fallacies. This is particularly important in our unfortunately politicized environment with respect to medicine and public health. The second special session will be from the Chair of the Board of Governors, Dr. Elisa Choi, who will present on Justice, Equity, Diversion, and Inclusion (JEDI), an important and relevant topic in medicine and for the ACP including our Chapter, which has a written statement upholding JEDI principles. This will be preceded by a Women-in-Medicine panel led by 3 of the Scientific Meeting Chairs members and promises to be an exciting and enlightening panel discussion for all members.

On Saturday, we will have our Doctors' Dilemma Finals Competition and Poster Competition Finals of vignettes and research from many brilliant medical students and residents. Additionally, for the first time we will have posters from our Early Career Physicians. Of course, don't miss the Governor's Awards Reception on Saturday night.

Lastly, this meeting and the work of this Chapter could not be possible without the never-ending work and long hours by Dawn Moerings, Bridget Ware, and Christopher Nuland.

LEARNING OBJECTIVES

At the conclusion of this activity, the participant will be able to:

- Apply updated knowledge of internal medicine to clinical practice
- Improve clinical practice by incorporating major new developments in subspecialty medicine
- Understand recent advances in internal medicine
- Satisfy requirements of state mandated educational course on Human Trafficking

21.5 CME CREDITS & 21.5 MOC POINTS AVAILABLE

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education through the joint providership of the Florida Medical Association and the American College of Physicians, Florida Chapter. The Florida Medical Association is accredited by the ACCME to provide continuing medical education for physicians.

The Florida Medical Association designates this live activity for a maximum of 21.5 *AMA PRA Category 1 Credits™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

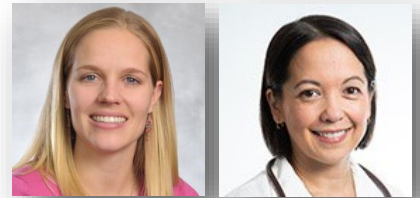

Successful completion of this CME activity, which includes participation in the evaluation component, enables the participant to earn up to 21.5 MOC points in the American Board of Internal Medicine's (ABIM) Maintenance of Certification (MOC) program. It is the CME activity provider's responsibility to submit participant completion information to ACCME for the purpose of granting ABIM MOC credit.

2022 CHAPTER EXCELLENCE AWARD

We are pleased to announce that our chapter is in receipt of the Gold Level of the 2022 Chapter Excellence Award! The award recognizes truly extraordinary chapters that surpass excellence in chapter management. We are in the company of 47 other outstanding chapters. In order to achieve the Gold Level of the Chapter Excellence Award, chapters must meet twenty Bronze criteria, seventeen Silver criteria and multiple Gold level activities. Criteria include such activities as having a legislative action plan or agenda, holding a volunteerism/ community service activity, holding multi-

ple stand-alone meetings, having revenue sources outside of dues and meeting registration fees, implementing a strategic plan, implementing a formal recruitment and retention plan and measuring outcomes, conducting various activities for Medical Students, Residents and Early Career Physicians. I would like to extend a special thanks to those chapter members who assisted us in all of these endeavors! For their hard work and dedication, we received this award.
