# MI-ACP and MDHHS Public Health Grand Rounds - The Impact of Climate Change on Human Health: Understand, Mitigate and Adapt

**Wednesday, May 21, 2025 • 12:00PM**

*Presented in conjunction with the Michigan Department of Health & Human Services*

**OPEN TO ALL – NO FEE TO ATTEND**

**PRESENTERS**

- Michael H. Zaroukian, MD, PhD, MACP, FHIMSS, FAMIA, Professor Emeritus of Medicine, Michigan State University College of Human Medicine; Governor-elect, Michigan Chapter of the American College of Physicians
- Kenneth Rosenman, MD, FACE, FACOEM, FACPM, Professor of Medicine, Chief of the Division of Occupational and Environmental Medicine, Michigan State University

## WHY ATTEND?

Join us for an essential webinar on the impact of climate change on patient health and the role of internal medicine physicians in addressing these challenges. Climate change is driving an increase in heat-related illnesses, respiratory conditions, and the spread of infectious diseases, yet many internists lack the knowledge and tools to recognize and manage these threats. This session will highlight the populations most vulnerable and discuss how healthcare systems can both mitigate their own carbon footprint and adapt to climate-induced health emergencies. Attendees will gain practical strategies for integrating climate-conscious care into their practice, working with interdisciplinary teams, and advocating for systemic change to improve health outcomes. Don't miss this opportunity to equip yourself with the knowledge and skills needed to tackle one of the most pressing public health issues of our time!

**CME  
INFORMATION**

The American College of Physicians (ACP) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. The ACP designates this other activity (live component and enduring component) for a maximum 1.0 AMA PRA Category 1 Credit(s)<sup>™</sup>. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

This meeting is also eligible for 1.0 MOC points.

## LEARNING OBJECTIVES

- Describe the major human activity-associated causes of climate change and their associated health hazards
- Identify populations at disproportionate risk of climate change-related illness or injury
- List the major health impacts and outcomes associated with global warming and climate change
- Describe the role of health systems in contributing to, mitigating and adapting to climate change
- Identify opportunities to drive improvements by working with public officials, public health professionals, employers, educators, patients and communities.
