Myocardial Injury after Noncardiac Surgery (MINS)

Kurt Ruetzler, M.D.

Myocardial injury after noncardiac surgery (MINS) is common, silent, and deadly. A multidisciplinary team approach is required to tackle this perioperative concern.

Objectives:

1. Gather a broad understanding of the concept of MINS
2. Identify perioperative strategies to reduce the risk of MINS
3. Identify patients at risk for MINS and indications for troponin surveillance
4. Understand the individual considerations for patients diagnosed with MINS
