

**American College of Physicians Wisconsin Chapter Statement in Support of
Minnesota Healthcare Workers, January 29, 2026**

The Wisconsin chapter of the American College of Physicians stands in support of our colleagues in Minnesota showing their courage and dedication during a period of crisis in their state. The American College of Physicians stands in opposition to policies and actions that promote violence of any kind, harm patients, limit access to care, interfere with medically appropriate treatment, or undermine the patient-physician relationship. ACP has called for health care settings to remain safe spaces where patients can seek care without fear and clinicians can provide confidential care without interference.

In an atmosphere of violence and intimidation, our colleagues in Minnesota show up with courage, dedication, and tenacity.

Your colleagues and friends in Wisconsin see you: physicians, nurses, and all health professionals working tirelessly to uphold our professional commitment to unbiased, dignified and respectful healthcare for all.
