

Title fully explains purpose of the table by describing the relationship between the rows and columns of the table.

Column headings identify the type of data and units of measurement.

Barriers to Resident Research: University-Based Programs Compared with Non-University-Based Programs

Barrier	Weighted Mean Scores*		P-Value
	University	Non-University	
Lack of resident time	1.8 ± 1.2	1.2 ± 1.2	< 0.001
Lack of resident interest	1.2 ± 1.1	1.2 ± 1.3	> 0.05
Lack of faculty time	0.3 ± 0.6	0.6 ± 0.9	0.006
Lack of faculty interest	0.1 ± 0.5	0.3 ± 0.8	0.04

* Results are given ± SD.

Row headings typically represent the category of data.

The field is the data within the table organized into rows and columns. The data is centered below the column heading and all data cells have an entry.
