Dear Georgia Chapter Members,

Please be advised that there is a current problem with the Composite Board website for physician license renewals. As I understand the problem, access to the system is intermittent so if you are due for a license renewal you may not be able to renew online. The problem is being worked on but there is no information on a system resolution.

Therefore, if you or other physicians in your group are due for a license renewal, please be aware there is an alternative way to renew with a form that is mailed to the Composite Board with a check. Please be advised there are late fees applied if your renewal is late.

Below is the link and attached is the form that you can use to renew if the system is down when you attempt to renew. To avoid renewal problems or late fees, please renew early.

http://www.medicalboard.georgia.gov/

Thank you
