

Dear Colleagues,

I hope you all had a great start to the new year!

Our regional programs have organized a one-month Fam Med rural summer preceptorship between the freshman and sophomore year as long as I can remember- I actually participated when I was a medical student myself.

We at UAMS have had several students ask if there are any primary care Internal Medicine physicians across the state who would be interested in serving as preceptors like the Fam Med docs. I think this is a wonderful idea. This is not for credit, so there is no formal evaluation process.

Mostly, you would just have the student shadow you in clinic, help with simple procedures, and even see some of your patients before you and then present to you if you deem appropriate.

Do let me know if you are interested in participating at TariqSaraG@uams.edu.

Best,

Sara Tariq
