Trump to declare opioid crisis a 'public health emergency'

President Trump on Thursday will announce he is directing his Department of Health and Human Services to declare the opioid crisis a public health emergency, senior administration officials said, taking long-anticipated action to address a rapidly escalating epidemic of drug use in the United States. Increased risk of burnout in female physicians

Female physicians are more burned out than their male colleagues, but there are steps they can take to reduce the stress associated with burnout, according to a blog post published in Medical Economics. Rebekah Bernard, MD, a family physician at Gulf Coast Direct Primary Care in Fort Myers, Florida, notes that female physicians have twice the level of burnout as their male colleagues. In addition, the rates of depression and suicide among female physicians are 2.4 to 4 times higher than in the general population. READ MORE

Short on staff: Nursing crisis strains US hospitals

A shortage of nurses at U.S. hospitals hit West Virginia’s Charleston Area Medical Center at the worst possible time. The non-profit healthcare system is one of the state’s largest employers and sits in the heart of economically depressed coal country. It faces a $40 million deficit this year as it struggles with fewer privately insured patients, cuts in government reimbursement and higher labor costs to attract a shrinking pool of nurses. READ MORE
