Georgia CORE is funding cancer research from State income tax filer donations

Did you know that the State of Georgia offers an option to donate to cancer research on the state income tax form? The program is listed as the Georgia Cancer Research Fund, item #32 on the Income Tax Form 500, and filers can donate as little as \$1. Georgia CORE funds promising research and disseminates innovative cancer discoveries right here in Georgia. Please consider giving to cancer research when you file this year, and help us continue to improve prevention, treatment, screening and survivorship outcomes for Georgians. Every donation makes a difference!
