Hello Idaho Chapter Members,

“There has been a much-needed focus on physician wellbeing in the last few years. ACP has been actively involved in advocating for physician burnout at many levels. One intervention to illustrate their commitment is the ‘Patients Before Paperwork’ initiative. As part of the process, ACP is interested in monitoring burnout at a state level. This will be reviewed at the Idaho ACP meeting in January. Please assist us with understanding physician burnout in Idaho and complete this very short 1-2 minute survey. Due by January 13. Thank you for your participation.”

Please complete the survey at the following link: Physician Wellbeing Survey before January 13, 2019.

Thank you,
Kelly Hess
Executive Director, Idaho ACP
