

Are You Ready for MACRA?

Ready to Transform Your Practice to Value Based Care?

Join the Maryland Learning Collaborative!

What is the Garden Practice Transformation Network (GPTN)?!

Experts from the Maryland Learning Collaborative, University of Maryland School of Medicine, Department of Family and Community Medicine united with the Maryland Health Care Commission, the Chesapeake Regional Information System for our Patients, or CRISP, Montgomery County Medical Society, MedChi, The Maryland State Medical Society, and Quality Improvement Advisors from the New Jersey Institute of Technology to develop a network of practices statewide in Maryland that are prepared to maximize opportunities available under MACRA. Please note that all services and support are provided to practices at no cost.

Physician practices in Maryland are eligible to participate in the GPTN if they are not already participating in a CMS Accountable Care Organization (ACO). Practices will be supported in establishing the following:

- A process for quality improvement and chronic care management
- Leverage new Medicare billing code changes
 - Transitional Care Management Codes
 - Chronic Care Management Codes
 - Advanced Directives Codes
- Be prepared for APMs (Advanced Payment Models) and MIPS (Merit-based Incentive Payment System) of reimbursement
