*Fostering Excellence In
Internal Medicine 2021*

ANNUAL SCIENTIFIC MEETING

OBJECTIVES

Participants will be able to –

- Understand non-anticoagulant therapy of thrombosis.
- Learn evaluation & treatment of BPH/lower urinary tract symptoms and familiarize with current medical and procedural treatments.
- Learn about advance care planning conversations and strategies for delivering news.
- Learn approaches and talking points to increase vaccine confidence and uptake.
- Understand latest updates for Hospital Medicine and Outpatient Medicine.
- Understand history of how systemic racism has been deeply rooted in medical education and understand cultural barriers of Black patients regarding their perception of trust in health care.
- Learn the impact of COVID on mental health and explore techniques of healing for health professionals and their teams.
- Learn how to design and determine a roadmap to recovery for patients with prolonged COVID-19 sequelae.
- Learn to assess risk for HIV acquisition and determine need for PEP and/or PrEP.
- Understand needs of AI/AN competent care and how to deliver and learn the basic structure of the successes of the Alaska Tribal Health System.
- Learn non-opioid focus for alcohol use disorder.
- Recognize how to risk stratify alcohol withdrawal management and counsel patients on pharmacotherapy for alcohol use disorder.
- Understand new therapies for weight loss.
- Understand upcoming changes to cervical cancer screening.
