

Guidelines International Network Standards for Clinical Practice Guidelines

Title of the Guideline	Should Remdesivir Be Used for the Treatment of Patients With COVID-19? Rapid, Living Practice Points From the American College of Physicians (Version 2)
Name of the Developing Organisation	American College of Physicians
Publication Date	February 9, 2021

Effective August 2013, G-I-N is requesting voluntary reporting on the G-I-N Guideline Standards¹ when a guideline is submitted for inclusion in the G-I-N Library.

Is your organisation willing to complete the form to provide information to a reader about your guideline?

YES

NO

Note: Rapid practice points are not clinical guidelines. Rapid practice points are designed to provide interim, time-sensitive answers, based on the best available evidence, to pressing questions related to individual and public health. The ACP practice points will be maintained as a living document and ACP Scientific Medical Policy Committee will monitor emerging evidence to determine its impact on the main findings and conclusions and issue updates as needed. See Additional Comments for full list of all update alerts and versions.

If Yes, please complete the checklist on the next page.
