

Variations among RPM Solutions

Equipment owned by:

- RPM company
- Physician/practice
- Patient

Transmission Technology:

- Bluetooth: links to a downloadable app that requires wi-fi to transmit upload
- Cellular: comes with a separate device that transmits data on its own

How data is uploaded:

- Manual: Patient uploads data to cloud for physician to download, or patient pushes data to physician by an embedded email function.
- Automated: data automatically uploads to a platform
- EHR integration: data automatically uploads to an integrated EHR

Quality of measurement device:

- FDA approved
- Is the accuracy clinically validated? (beyond FDA approved)

Functionality:

- Solely remote recording and transmission of physiologic data
- Real-time alerts to patient
- Customizable patient panel management tools for clinical staff
- Billing and coding support for practice
- Engagement reminders to patients (to help meet monthly threshold for monitoring time)
- Patient engagement and retention tools, (videos, questionnaires etc.)
